

## KEY INVESTOR INFORMATION

*This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.*

# ALMA PLATINUM IV SELWOOD MARKET NEUTRAL CREDIT

**Share Class: R1C-E (ISIN: LU1769346039), (WKN: A2JDGY), (Currency: EUR)**

a sub-fund of Alma Platinum IV. The Fund is managed by Alma Capital Investment Management.

## OBJECTIVES & INVESTMENT POLICY

The aim of the Fund is to seek capital appreciation, relative to inherent investment risks.

The investment manager of the Fund is Selwood Asset Management LLP (the Investment Manager).

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund invests in a range of financial instruments which mainly reference credit indices such as iTRAXX Main Index and Markit CDX North America Investment Grade indices and companies based in Europe and North America. These financial instruments include total return swaps (agreements to exchange a particular asset for the performance of another over a set period of time), credit default swaps (agreements where one party covers a potential loss with reference to a debt instrument in return for a periodic payment), options (agreements where one party has the right to buy or sell a financial instrument at a particular price within a fixed term) and tranches on such credit indices (agreements where one party covers a particular portion of the potential loss on an index in return for a periodic payment).

The Fund invests in credit opportunities that the Investment Manager considers will generate returns (long positions) and bets against (take short positions) credit opportunities it believes will drop in value,

independent of the performance of the market generally. The Fund aims to be market neutral (meaning that it uses financial contracts (derivatives) to seek to achieve an effect that performance of the Fund is neutral to the effect of the market increasing or decreasing). The Investment Manager seeks to identify investment opportunities where it believes that the current market value of the investment does not reflect the inherent value of the investment.

The Fund uses various risk management techniques to seek to achieve its objective relative to the risks inherent in the portfolio.

As well as using financial contracts (derivatives) to efficiently manage the portfolio and with the aim to reduce foreign currency exposure in respect of the assets (hedging), the Fund will use derivatives for investment purpose. The gross leverage is not expected to exceed 3500% of the value of the Fund.

The Fund, which is calculated in Euro, may use hedging to try to reduce the effect of foreign exchange rate fluctuations where investments are denominated in currencies other than Euro.

No dividends will be paid on your shares.

You may redeem your investment on demand on a weekly basis.

## RISK AND REWARD PROFILE

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment. The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund relies upon the performance of the investment manager of the underlying strategy. If that investment manager performs poorly the value of your investment is likely to be adversely affected.

The Fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.

The Fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ sophisticated strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).

The Fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

The Fund has increased exposure to particular investments known as leverage. A fall in value of such investments can result in a proportionately greater loss to the Fund.

The Fund may take long and/or short positions in credit default swaps, including tranches thereof. Credit default swaps carry specific risks including high level of leverage, possibility that premiums paid for entering into credit default swaps expire worthless, wide bid/offer spread and documentation risk.

More information in relation to risks in general may be found in the «Risk Factors» section of the prospectus.

## CHARGES

The charges paid/you paid are used to finance the costs of running the Fund, including the costs of distribution. These charges reduce the potential growth of investments.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charges	2.04%
CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance fee	
Where the Gross NAV (net asset value after deduction of certain fees but not performance fee) exceeds the higher of (i) the highest Gross NAV at any previous year end or (ii) the issue price (High Watermark), 20% of the amount, negative or positive, that the Gross NAV exceeds the higher of (i) the prior day's Gross NAV and (ii) the High Watermark, will accrue daily and be paid annually. In the last financial year 0.49% of daily average value of the share class was charged as performance fee.	

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is an estimate of expenses. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

The Board of Directors may impose a Dilution Levy for net subscriptions or net redemptions received on any Transaction Day in the best interest of Shareholders.

For more information about charges, please refer to the "Fees and Expenses" section of the Prospectus, which is available at [www.fundsquare.net](http://www.fundsquare.net).

## PAST PERFORMANCE

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2018 and the share class was launched in 2018. Past performance has been calculated in EUR.

As from 11-01-2020, the management company changed from DWS Investment S.A. to Alma Capital Investment Management.
