ALMA PERDURANCE EUROPEAN EQUITY FUND

Share Class: I EUR - C (ISIN: LU1687386257), (Currency: EUR)

a sub-fund of Alma Capital Investment Funds. The Fund is managed by Alma Capital Investment Management.

OBJECTIVES & INVESTMENT POLICY

The investment objective of the Fund is to seek long-term capital appreciation and to outperform the MSCI Europe ex-UK Total Return Net Index (the "Benchmark"). The Fund intends to invest its assets principally in equity securities of European companies or non-European companies whose shares trade on a European exchange or that the Investment Manager determines are otherwise actively traded in Europe.

The Fund will seek to achieve its investment objective by investing in equity securities of all types of market capitalisation, with a focus on larger capitalisations.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund has significant discretion over the composition of its portfolio in terms of constituents and allocation; the holdings of the Fund may then deviate significantly from the constituents of the Benchmark.

Perdurance Asset Management Limited manages the portfolio of this Fund.

All income in the Fund is reinvested.

Institutional investors can buy and sell shares of the Fund on a daily basis.

The **first investment** must amount to **at least** 250,000.00 Euros.

RISK AND REWARD PROFILE

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

As it is based on its historical behaviour, **it does not necessarily reflect future risk, nor reward.**

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund. »

This classification is solely valid as of the date of this document; it can change in the future.

Investors investing in a fund in the category "1" above may sustain a loss. A fund in this category is not risk free at all times.

The Fund does not provide investors with any guarantee of performance nor of the value of investments in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of movements in financial markets and currencies, **under normal market conditions.**

Risks materially relevant to the Fund which are not captured by the indicator:

Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis the portfolio.

Currency risk: there is a risk of loss arising from exchange-rate fluctuations or exchange control regulations.

Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/ fluctuations that may impact portfolio valuation.

Selection risk: the Investment Manager's judgment about the attractiveness, value and potential appreciation of a particular company's security could be incorrect.

More details on the risks investors may be exposed to when investing in this Fund are described in the "Risk Factors" section and the relevant Special Section of the Prospectus.
