What is this product?

Type

- This product is a class of share of the Sub-Fund and denominated in USD. The Fund Alma Capital Investment Funds is an open ended investment company with a variable capital and qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS"), subject to Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.
- As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Objectives

Investment objective

- The objective of the Sub-Fund is to seek capital appreciation by investing primarily in shares of global companies operating in various regions and countries. The Sub-Fund will invest primarily in developed countries, but may invest up to 20% of its assets in emerging markets. The Sub-Fund invests in companies of any size market capitalisation.

Investment policy

- The Sub-Fund seeks to invest in stocks whose future prospects are misunderstood or not fully recognized by the market. The Sub-Fund employs a fundamental value investing approach which seeks to exploit market inefficiencies created by irrational investor behavior. To identify these investment opportunities, the Sub-Fund employs a disciplined, bottom-up investment process highlighted by rigorous, internally-generated fundamental research. With the exception of diversification guidelines, the Sub-Fund does not employ predetermined rules for sales; rather, the Sub-Fund evaluates each sell candidate based on the candidate's specific risk and return characteristics which include: 1) relative valuation; 2) fundamental operating trends; 3) deterioration of fundamentals; and 4) diversification guidelines.
- Equity securities include common and preferred stock, securities convertible into common or preferred stock such as convertible preferred stock, bonds and debentures; and rights or warrants to purchase common or preferred stock, as well as other securities with equity characteristics, such as investment companies and ETFs that invest primarily in equity securities, subject to the restrictions set out in Article 41 of the 2010 Law.
- The Sub-Fund may purchase equity securities on exchanges other than where their companies are domiciled (often traded as dual listed securities) or in the form of depositary receipts, which include American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) or similar securities.
- The Sub-Fund may attempt to hedge currency exchange risk associated with securities denominated in various currencies other than the reference currency by entering into currency contracts, such as spot, forward and futures. There is no assurance that these hedging transactions will be successful or that such hedging transactions will not themselves generate losses.

- A maximum of 10% of the Sub-Fund's net assets may be invested in units or shares of UCITS or Other UCIs.
- At times, the Investment Manager may judge that market conditions may make pursuing the Sub-Fund's investment strategies inconsistent with the best interests of its shareholders.
- The Sub-Fund may invest in certain types of derivatives, including, but not limited to, options, futures and options on futures, swaps and forward currency exchange contracts.
- In exceptional market situations, the Sub-Fund may temporarily hold up to 100% of its assets in cash.
- The Sub-Fund uses financial instruments to reduce the impact of changes in currency exchange rates.
- The Sub-Fund is actively managed with no reference to a benchmark.
- The Sub-Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics in compliance with Article 8 of the Sustainable Financial Disclosure Regulation ("SFDR").
- Given the above objectives and the risk and reward profile of the product, the recommended holding period is 5 years.
