Alma Platinum IV Systematic Alpha

Fund Assets under Management: \$101,267,395

Investment Strategy

Alma Platinum IV Systematic Alpha (the "Fund") is an open-ended UCITS compliant fund with Winton Capital Management Ltd ("Winton") acting as Portfolio Manager. The Investment Strategy is a systematic strategy based on the Winton Diversified Macro Strategy as adapted to comply with UCITS. The underlying investment philosophy is grounded in the belief that the scientific method can be profitably applied to the field of investing. The Investment Strategy is a computer-based trading system owned and operated by Winton which is designed to speculatively trade global exchange-traded futures, forwards and options markets on commodities (e.g. energies, base and precious metals and crops), equity indices, bonds, short-term interest rates and currencies. The Fund invests directly in (1) financial futures (including bonds, FX, equity, interest rates), FX forwards and other OTC derivatives (the "Direct Investments"), (2) transferable securities providing exposure to a basket of commodity futures (the "Commodity Basket"), and (3) sovereign bonds, cash or other cash equivalent securities for cash management purposes. Winton has been appointed as Portfolio Manager of the Fund and is responsible for managing the Direct Investments. Winton is also responsible for determining the composition of the Commodity Basket that is referenced by the transferable securities purchased by the Fund. State Street Global Advisors, as the Investment Manager of the Fund, is responsible for the allocation of cash to support the margin and settlement obligations in relation to the Direct Investments as well as the buying and selling of the transferable securities and for managing the surplus cash.

Performance History (10.06.2015 - 31.03.2021) ⁽¹⁾

Monthly Return Last 12 Months ⁽¹⁾

Key Benefits

- The Fund complies with the UCITS restrictions for diversification and risk-spreading and offers daily liquidity.
- The Fund provides access to a UCITS compliant version of the Winton Diversified Macro Strategy⁽²⁾.
- Independent Valuation: NAVs calculated by an independent third party. Winton only acts as Portfolio Manager.
- The Fund provides investors with the potential for obtaining gains in downward trending markets and improved portfolio risk/return profile.
- Provides investment returns linked to liquid instruments diversified geographically and across asset classes.
- One month rolling currency hedges are effected for share classes not denominated in USD to protect against fluctuations of exchange rate⁽³⁾.

Key Risks

- The value of an investment in the Fund may go down as well as up and can result in losses, up to and including a total loss of the amount initially invested.
- The Fund may enter into one or more derivatives with a number of swap counterparties. If any of the counterparties fail to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.
- The Fund is complex and based on a CTA trading strategy which uses derivatives to take long or short positions on various markets. The use of derivatives involve a high level of risk as derivatives can be highly leveraged, highly volatile and may magnify losses.
- Movements in exchange rates can impact the value of your investment. If the currency of your country of origin is different from the currency in which the underlying investments of the Fund are made (USD), the value of your investment may increase or decrease subject to movements in exchange rates.
- The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ complex strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).

Commentary - Winton Capital Management Ltd - March 2021⁽¹⁶⁾

Trend-following systems drove the fund's 0.61% return in March, with profits also accruing from non-trend systems, most notably currency carry and a range of fundamental signals in agriculture.

Stock indices and currencies drove the fund's positive performance over the month. Trend-following systems remain long stock indices, as global equity markets climbed to new record highs. Profits in currencies, meanwhile, were driven by both carry and trend-following systems, with a short position in the Japanese yen representing the top contributor. The US dollar, which weakened over much of 2020, continued to strengthen against most major currencies in March. Elsewhere, profits in livestock cancelled out losses in crops, while metals were negative due to a long position in silver.

(14) State Street Global Advisors manage surplus cash on behalf of the fund, with the objective of maintaining a high level of liquidity whilst preserving capital, by investing in sovereign bonds and money market instruments such as time deposits, certificates of deposits and commercial paper. The remaining cash is either held at the custodian, posted as margin or invested in commodity linked transferable securities. (15) Source: Alma Capital.
