Alma Platinum Quantica Managed Futures Focus

Fund Assets under Management: \$131,726,013

Investment Strategy

Alma Platinum Quantica Managed Futures Focus (the "Fund") is an open-ended UCITS compliant fund with Quantica Capital AG ("Quantica") acting as Investment Manager. The Investment Strategy intends to gain exposure to global exchange-traded futures markets on equity indices, bonds, interest rates and currencies, all in accordance with Quantica's proprietary systematic investment strategy. It aims to detect and take advantage of medium-term trend-following market inefficiencies in the financial futures markets (excluding commodity markets). It has low long-term correlation to traditional asset classes and offers diversification to both traditional and non-traditional investment portfolios. The Fund is highly style-consistent and follows a robust approach.

Performance History (03.07.2018 - 30.11.2020)⁽¹⁾

Monthly Return Last 12 Months⁽¹⁾

Key Benefits

- The Fund provides access to a UCITS-compliant ESG adaptation of Quantica's flagship managed futures program, excluding commodities ("Quantica Managed Futures Focus Program")⁽²⁾
- The Quantica Managed Futures Focus Program has generated a net annualized rate of return of 7.7% with a realized volatility of 10.7% p.a.⁽³⁾
- The program follows a fully systematic trend-following approach and aims to deliver a positive long-term rate of return with a low long-term correlation to traditional asset classes such as stocks and bonds.
- It trades the most liquid financial futures contracts and has no exposure to any commodity markets.
- The program is designed along the same core principles as Quantica's flagship product, the Quantica Managed Futures Program, which has a track record of more than 15 years.
- The proprietary model has the flexibility to hold both long positions to benefit from rising prices, and short positions to benefit from price declines.
- One month rolling currency hedges are effected for share classes not denominated in USD to protect against fluctuations of exchange rate⁽⁴⁾
- The Fund complies with the UCITS restrictions for diversification and risk-spreading and offers daily liquidity.

Key Risks

- The Fund may enter into one or more derivatives with a number of swap counterparties. If any of the counterparties fail to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. The derivatives traded are the most liquid exchange traded futures contracts only.
- The Fund is complex and based on a CTA trading strategy which uses derivatives to take long or short positions on various markets. The use of derivatives involve a high level of risk as derivatives can be highly leveraged, highly volatile and may magnify losses.
- Movements in exchange rates can impact the value of your investment. If the currency of your country of origin is different from the currency in which the underlying investments of the Fund are made (USD), the value of your investment may increase or decrease subject to movements in exchange rates.
- The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ complex strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).
- The value of an investment in the Fund may go down as well as up and can result in losses, up to and including a total loss of the amount initially invested.

Monthly Fund Performance (I1C-U Share Class)⁽⁵⁾

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD

*Performance has been calculated since the share class launch

(1) Source: Alma Capital. The Fund's performance above is shown net of all fund fees. Past performance is not a reliable indicator of future returns. (2) The Fund does not provide exposure to Quantica Managed Futures Focus Program and no representation is made that the Fund is likely to achieve returns similar to Quantica Managed Futures Focus Program track record. (3) Quantica Managed Futures Focus Program statistics reflect the performance of the Quantica Focus carve-out track record (source: Quantica Capital AG as of 30 November 2020) up to and including July 2018 and Alma Platinum Quantica Managed Futures Focus class I1C-U from August 2018 to November 2020 (source: Alma Capital, as of November 2020). The Quantica Focus carve-out track record reflects live realized returns and is derived from realized QMF Program gross returns, scaled according to the defined portfolio construction rules applied to construct the Quantica Focus model portfolio; it is hence a realistic approximation of historical strategy returns. Figures are net of 1% p.a. management fee and 20% performance fee. Alma Capital takes no responsibility for content not provided by Alma Capital. The Quantica Focus carve-out track record is being shown in this material only to illustrate Quantica's long term track record and skills in managing investment strategies. There may be significant differences between the Quantica Focus carve-out track record and the Fund. The information relating to the Quantica Focus carve-out track record should not be used as a direct comparison to the Fund. Please note that no representation is being made that the Fund is likely to achieve returns in the future similar to the Quantica Focus carve-out track record shown. Past performance is not a reliable indicator of future results. (4) There may be differences between the performances of share classes denominated in different currencies; any gain or loss in the Fund during the calendar month is not hedged and is exposed to FX risks. Source: Alma Capital unless otherwise specified. Alma Capital takes no responsibility for content it has not produced. (5) Source: Alma Capital. The Fund's performance is shown net of all fund fees. Past performance is not a reliable indicator of future results. All information as of 30 November 2020 unless otherwise specified. Please refer to the disclaimers at the end of this document.

Commentary - Quantica Capital AG - November 2020 ⁽¹⁴⁾

The Quantica Managed Futures Program returned 4.39% for the month, bringing the annual net performance to -0.82%.

November was largely dominated by record advances in global equity markets with the MSCI World Index returning 13%, its biggest monthly gain on record. The US S&P 500 Index climbed by 11% to new all-time highs. The renewed and strong upward trend in global equity markets, together with steadily declining volatility levels, has led the Program to increase its net equity exposure from 41% to 57% at the end of November. The bulk of the rise was driven by Asian and Emerging Markets to the benefit of the Program's equity book diversification, which started the month with a concentrated share in US equity indices. The equity book accounts for three quarters or 3.3% of QMF's gains in November.

Bond yields were largely unaffected by the equity rally with the US 10-year yield ending the month unchanged at 0.84%. The Program's aggregate net exposure to fixed income at the end of November is perfectly neutral, having reduced the net long exposure to European – mainly French and Italian – bonds to 37% and at the same built up a net short exposure to US bonds of -37%. For the month, fixed income and rates had accounted for a small negative return contribution of -0.6%.

In currencies, the US Dollar resumed its weakening trend with the Bloomberg Dollar index dropping by 2.1% in November. This benefited the QMF Program's net short USD positions across Europe, Asia and Emerging Markets, contributing a positive 0.9% for the month.

Overall, two thirds of the Program's risk remains allocated to a diversified book of long global equity indices, with FX positions reflecting a short US Dollar exposure making up a large part of the rest.
