

Quantica Managed Futures UCITS Fund

January 2026

ALMA CAPITAL
QUANTICA CAPITAL

Description

The Quantica Managed Futures (QMF) UCITS Fund is a Luxembourg domiciled UCITS SICAV Fund that provides 100% participation in the QMF Program, which is owned and operated by Quantica Capital. The QMF Program is a diversified systematic trend-following strategy with a 20-year track record. The QMF Program aims to deliver attractive risk-adjusted returns while being largely uncorrelated to traditional market risk factors over a medium to long-term investment horizon. The QMF Program trades around 100 liquid futures markets within equities, fixed income, interest rates, commodities, and currencies. It seeks to identify and take advantage of medium-to-long-term market trends in risk-adjusted relative price movements based on a proprietary robust statistical signal generation and risk management framework. The QMF Program may act as a complement to both traditional as well as alternative portfolios due to its attractive risk-adjusted returns and diversification benefits. The Program is accessible through multiple commingled vehicles and segregated accounts and serves a global client base. While being actively managed, the Fund is not managed in reference to a benchmark index.

Monthly Net Returns¹ (USD)

Past performance does not predict future returns. Performance is shown net of all fund fees.
