

Winton Alma Diversified Macro Fund (UCITS)

Monthly report – April 2026

Fund assets: \$120.1m | Strategy assets: \$7.2bn | Winton AUA: \$17.8bn¹

Fund overview

The fund offers a UCITS point of access to Winton's flagship Diversified Macro CTA strategy. The fund is based on almost three decades of research and development at the forefront of systematic trend following. The fund combines a core 75% allocation to trend following with 25% exposure to diversifying signals and trades across commodities, credit indices, currencies, equity indices and fixed income.

Market commentary

Long exposure to energies and commodity currencies drove the fund's positive performance in April, with further gains from short exposure to fixed income.

Uptrends in oil and oil products continued through April amid concerns around how the US blockade on the Strait of Hormuz would affect global oil supply. While the fund's exposure to the sector was reduced slightly over the first half of the month in response to elevated market volatility, the positions later increased as the trends strengthened. It was a similar story in currencies, with the Australian dollar, Brazilian real and Norwegian krone among the top contributors, alongside the British pound. Fixed income positions also made money after exposure turned net short again in March.

Metals were the only detractor of note during the month, as precious metals and copper continued to retrace gains made earlier in the year.

Report notes

1. Strategy and Firm AUA is adjusted to account for the same strategies operating at different levels of risk. The figures are based on internal estimates. Firm AUA includes accounts that do not follow strategies referenced in this material. This figure is not equivalent to the "Regulatory Assets Under Management" reported in the firm's Form ADV. Firm AUA includes discretionary and non-discretionary assets under management for Winton Capital Management Limited and Winton Investment Management (Shanghai) Co., Ltd.
2. Source: Morningstar. **Past performance is not indicative of future results.** Performance shows the net returns since inception in June 2010 for Winton Alma Diversified Macro Fund IIC-U share class. Returns are net of all fees.
3. Reference assets include Bloomberg Global Aggregate Index; MSCI World Index; S&P GSCI Index and; US Dollar Index.
4. Track record of all share classes are available upon request.
5. Risk statistics are shown as the average throughout the month. Sensitivities have been calculated by estimating how correlated each of the positions in the fund are with respect to the factor in question. Hence these calculations assume that our position remains unchanged and that the correlation structure of the portfolio remains fixed.
6. Leverage figures are shown as the average throughout the period. Fixed income leverage is calculated by multiplying the notional value by the ratio of the modified duration of the contract to the modified duration of a 10-year T-note. For currencies, exposure is netted when there are two contracts involving the same currency with opposing exposure. This includes FX derivative contracts but not indirect exposure (e.g., assets priced in dollars). Netting may be applied where multiple instruments have identical but opposing underlying exposure.
7. When calculating the portfolio gross leverage, the contribution from currency markets is divided by two to avoid double-counting. The references to Winton leverage and UCITS leverage refer to different methodologies used to calculate the fund's leverage. The calculation of the UCITS leverage using the commitment method, defines leverage as the sum of notional values of the instruments in the portfolio.
8. The risk and reward is calculated using historical data which may not be a reliable indicator of the Fund's future risk. The risk and reward category may shift over time and is not a target or guarantee. The lowest category (i.e. Category 1) does not mean a risk-free investment.
9. Please refer to the prospectus for full terms and conditions. Investments are to be made solely on the terms of the relevant prospectus, and no reliance should be placed on this document.
10. Registered countries where at least one share class of the fund is registered.
