ALMA PLATINUM IV UBS MULTI STRATEGY ALTERNATIVES

Share Class: I4C-E (ISIN: LU1960255708), (WKN: A2PFSS), (Currency: EUR)

a sub-fund of Alma Platinum IV. The Fund is managed by Alma Capital Investment Management.

OBJECTIVES & INVESTMENT POLICY

The aim of the Fund is to seek capital growth.

The Fund is a “multi-manager” fund, meaning that Alma Capital Investment Management (Management Company) appoints a number of sub-investment managers each to a segment of the assets of the Fund (Segment). UBS Hedge Fund Solutions LLC (Investment Advisor) advises the Management Company on the selection of sub-investment managers and allocation of the Fund to each Segment from time to time.

The Fund is actively managed which means that the sub-investment managers are actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The sub-investment managers will invest in a wide range of investments, using a variety of investment strategies and techniques. Among these may be i) “equity hedge” strategies, where the Fund will invest in shares of companies but use financial contracts (derivatives) to try to limit the effect of negative market movements; ii) “relative value” strategies, where the Fund will invest in a variety of assets but will try to take advantage of mispricing and other opportunities to gain a return; iii)

“trading strategies” where the Fund will invest in a broad range of assets (shares in companies, foreign exchange, tradable debt issues by companies and governments, currencies) where a sub-investment manager believes that it can achieve a return; and iv) “credit/income” strategies where the Fund will invest in debt investments. The Fund will not invest in units or shares of other UCITS or other UCIs, with the exception of exchange traded funds in which the Fund may invest up to 10% of its Net Asset Value.

As well as using derivatives to efficiently manage the portfolio and with the aim to reduce foreign currency exposure in respect of the assets (hedging), the Fund will use derivatives for investment purposes. The gross leverage is not expected to exceed 3000% of the value of the Fund.

The Fund, which is calculated in Euro, may use hedging to try to reduce the effect of foreign exchange rate fluctuations where investments are denominated in currencies other than Euro.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

RISK AND REWARD PROFILE

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund’s future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 4 because of the medium range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

The Fund relies upon the performance of the Investment Advisor, Management Company and sub-investment managers. If those entities perform poorly, the value of your investment is likely to be adversely affected.

The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ sophisticated strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).

Sub-investment managers invest wholly independently of one another and the Segments may at times hold the same or similar positions or economically offsetting positions. To the extent that Segments hold economically offsetting positions, the Fund will continue to incur expenses, including performance fees, despite its inability to achieve a gain or loss.

As the Performance Fee is calculated and may be payable to a sub-investment manager with respect to the performance of its Segment only and not the performance of the Fund as a whole, it is possible that a Performance Fee could be paid to a sub-investment manager in circumstances where the overall performance of the Fund as a whole is negative.

More information in relation to risks in general may be found in the «Risk Factors» section of the prospectus.
