InRIS Parus

A sub-fund of InRIS UCITS PLC

Share Class: Class C Euro Unhedged
ISIN: IE00BCBH92

OBJECTIVES AND INVESTMENT POLICY

- The objective of InRIS Parus (the “Fund”) is to generate absolute returns by using a long / short equity strategy.
- This strategy is mostly long growth stocks and short companies with a structurally declining business.
- In order to achieve its investment objective, the Fund will use a bottom-up approach, emphasizing stock picking, based on in-house fundamental analysis together with portfolio monitoring and risk control.
- The Fund will primarily invest directly or indirectly in equities but will also use Financial Derivatives Instruments (“FDIs”). The Fund will primarily invest in North America or Europe but may also invest from time to time in other markets (including up to 20% of its NAV in emerging markets).
- The Fund may take synthetic long and short positions through investments in derivatives. The derivative’s return is linked to movement in the underlying asset. A short sale involves the sale of a security that the seller does not own in the hope of buying the same security (or a security exchangeable for the same) at a later date at a lower price. A long sale does the opposite.
- The Trading Advisor is free to choose how the assets of the Fund are invested within the limits of its investment policy.
- The Fund does not currently pay a dividend. Any income arising is retained in the Fund and reflected in the value of the Share Class. Your Shares will be denominated in Euro, while the Fund’s Base Currency will be US Dollar.
- You may redeem your investment on every Wednesday and if such a Wednesday is not a Business Day, the preceding Business Day and/or such other day or days as the Directors may determine.
- Recommendation: this Fund may be appropriate for investors who have an investment horizon of three years or more
- The Fund is actively managed with an absolute return approach. Solely by virtue of the fact that it uses the MSCI World 100% Hedged to EUR Net Total Return Index (the “Benchmark”) for performance comparison purposes only, the Fund is considered to be actively managed in reference to the Benchmark. However, the Trading Advisor has full discretion over the composition of the Fund’s portfolio, which is not constructed with any reference to the Benchmark. The performance fee is not calculated with reference to the Benchmark.
- For further information, please see the “Investment Objective” and “Investment Policy” sections of Supplement 1 to the Prospectus. Unless otherwise defined in this document, all words and expressions defined in the Company’s current Prospectus shall have the same meaning herein.

RISK AND REWARD PROFILE

The risk indicator is based on the maximum value at risk of the Fund. Historical data may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

Why is this fund in category 7?

The Fund is classified as category 7 as the risk of losing your investment is high due to the level of volatility the Fund is exposed to having regard to the nature of its investments, but there is a chance of making higher gains. The below risk factors may impact the value of the Fund’s investments or expose the Fund to losses.

Risks materially relevant to the Fund which are not adequately captured by the indicator:

- **Equity Risk** – Equity risk and/or changes to the equity risk premium will have a significant impact on the performance of the equities held in the Fund. Potential or actual change in any

company’s financials held by the Fund could increase the level of perceived or actual risk.

- **Derivatives Risk** – Derivatives are highly sensitive to changes in the value of the assets they are based on. The impact on the Fund is greater as derivatives are used in an extensive way. The use of derivatives may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its NAV and may result in gains or losses that are greater than the original amount invested.
- **Counterparty Risk** – The insolvency of any institutions providing services, such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Share Currency Designation Risk** – Changes in the value of the Base Currency of the Fund (USD) relative to the denominated currency of this Share Class may give rise to a risk for investors.
- **Liquidity Risk** – Some of the underlying investments of the Fund may be more difficult to buy and sell which may affect the Fund’s value.

Please see the section entitled “Risk Factors” in the Prospectus and in Supplement 1 to the Prospectus for a full list of risks related to the Fund.
