InRIS Perdurance Market Neutral

Share Class: Class C USD Hedged
ISIN: IE00BZ60L725

A sub-fund of InRIS UCITS PLC

OBJECTIVES AND INVESTMENT POLICY

- The objective of the InRIS Perdurance Market Neutral (the “Fund”) is to produce long term capital growth by investing in a market neutral portfolio of European equities while delivering low correlation to the European equity markets.
- The Fund will invest in equities listed or traded on a Recognised Exchange mainly in developed European countries and will also seek exposure to equity markets by investing in financial derivative instruments (“FDIs”).
- The Fund will employ a European equity market neutral strategy that relies primarily on stock picking. Some of the factors considered by the Fund in its selection of investments are (i) the relative valuation of a company, (ii) the liquidity of that company; and (iii) the contribution that the stock would make to the conceptual diversification (and sectors, styles and geographies) of the portfolio.
- The Fund will significantly invest in FDIs for investment, efficient portfolio management, hedging and cash management purposes at any one time. For hedging purposes, the Fund may use FDIs to hedge against fluctuations in the relative values of its portfolio positions due to changes in currency exchange rates and market interest rates.
- The Fund by virtue of the use of derivatives, may at any one time have significant cash balances to invest, which may be invested in government bonds, money market funds and money market instruments, including, but not limited to, certificates of deposit, fixed or floating rate notes and fixed or variable rate commercial paper (which are considered investment grade or above as rated by the principal rating agencies) and in cash deposits denominated in such currency or currencies as may determine from time to time.
- The Fund may invest up to 10% of the NAV in other collective investment schemes.
- The Fund does not currently pay a dividend in respect of this Share Class. Any income arising is retained in the Fund and reflected in the value of the Share Class. Your Shares will be denominated in US Dollars, and the Fund’s Base Currency will be Euro.
- You may redeem your investment on every Business Day and/or such other day or days as the Directors may determine.
- Recommendation: this Fund may be appropriate for investors who have an investment horizon of three years or more.
- The Fund is actively managed with an absolute return approach. Solely by virtue of the fact that it uses the Stoxx Europe 600 ex UK Index (the “Benchmark”) for performance comparison purposes only, the Fund is considered to be actively managed in reference to the Benchmark. However, the Trading Advisor has full discretion over the composition of the Fund’s portfolio, which is not constructed with any reference to the Benchmark. The performance fee is not calculated with reference to the Benchmark.
- For further information, please see the “Investment Objective” and “Investment Policy” sections of Supplement 7 to the Prospectus. Unless otherwise defined in this document, all words and expressions defined in the Company’s current Prospectus shall have the same meaning herein.

RISK AND REWARD PROFILE

The risk indicator is based on the maximum value at risk of the Fund. Historical data may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

Why is this Fund in category 6?

The Fund is classified as category 6 as the risk of losing your investment is higher due to the level of volatility the Fund is exposed having regard to the nature of its investments, but there is a chance of making higher gains. The below risk factors may impact the value of the Fund’s investments or expose the Fund to losses.

Risks materially relevant to the Fund which are not adequately captured by the indicator:

- **Share Currency Designation Risk** – Changes in the value of the base currency of the Fund (Euro) relative to the denominated currency of this share class may give rise to a risk for investors.

- **Derivatives Risk** – Derivatives are highly sensitive to changes in the value of the assets which they are based on. The impact on the Fund is greater as derivatives are used in an extensive way. The use of derivatives may result in the Fund being leveraged.
- **Equity Risk** – Equity risk and/or changes to the equity risk premium will have a significant impact on the performance of the equities held in the Fund. Potential or actual change in any company’s financials held by the Fund could increase the level of perceived or actual risk.
- **Use of Leverage** – The use of leverage may result in the Fund’s market exposure being significantly higher than its equity and may expose the Fund to additional risks, including (i) greater losses from investments than would otherwise have been the case had the strategy not applied leverage, (ii) margin calls or interim margin requirements which may force premature liquidations of investment positions and (iii) the lack of ability to liquidate assets quickly enough to repay its obligations.
- **Counterparty Risk** – The insolvency of any institutions providing services, such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Please see the section entitled “Risk Factors” in the Prospectus and in Supplement 7 for a full list of risks related to the Fund.
