## Investment Strategy

- The objective of the Fund is to achieve long term capital growth by investing in a market neutral portfolio of European equities while delivering low correlation to the European equity markets.
- The Fund will invest in equities listed or traded on a Recognised Exchange mainly in developed European countries and will also seek exposure to equity markets by investing in financial derivative instruments ("FDIs").
- The Fund will employ a European equity market neutral strategy that relies primarily on stock picking. Some of the factors considered by the Fund in its selection of investments are (i) the relative valuation of a company, (ii) the liquidity of that company; and (iii) the contribution that the stock would make to the conceptual diversification (and sectors, styles and geographies) of the portfolio.

## Commentary - Perdurance AM - April 2023 <sup>(7)</sup>

The main alpha contributor in April was Demant (hearing aids), adding 0.9%, after the company pre-released good results. On the negative side, Alstom (railroad infrastructure) cost 0.9% of alpha after the CFO's sudden departure.

The Fund has remained market neutral throughout the month and had a net beta-adjusted exposure of 0% at the end of the month. The Fund has sought both to maintain a strict market neutrality and achieve a broadly macro-economically neutral portfolio. There were 20 positions in the long book at the end of the month. The top 5 long positions comprised 32% of the Fund's NAV at the end of the month as the Fund remained very concentrated. The Fund is highly liquid, as 100% of the portfolio could be liquidated within 1 week, using conservative liquidity assumptions.
