Investment Strategy

- The objective of the Fund is to achieve long term capital growth by investing in a market neutral portfolio of European equities while delivering low correlation to the European equity markets.
- The Fund will invest in equities listed or traded on a Recognised Exchange mainly in developed European countries and will also seek exposure to equity markets by investing in financial derivative instruments ("FDIs").
- The Fund will employ a European equity market neutral strategy that relies primarily on stock picking. Some of the factors considered by the Fund in its selection of investments are (i) the relative valuation of a company, (ii) the liquidity of that company; and (iii) the contribution that the stock would make to the conceptual diversification (and sectors, styles and geographies) of the portfolio.

Investment Manager - Perdurance AM ⁽¹⁾

- JFSC-registered Jersey-based independent investment firm founded in 2014, with over \$85m in AUM.
- Portfolio is managed by Ivan Briery, founder of the firm, who worked as a partner at Soros Fund Management and as a co-founder and portfolio manager at Voltaire AM.
- Specialised in European equity investing.
- Significant proportion of Perdurance's profits is allocated to philanthropic projects.

Commentary - Perdurance AM - December 2023 ⁽⁷⁾

The primary alpha contributors for the month were Prysmian (energy and telecom cables) after the company announced several new contracts and DSV (transport services) as Deutsche Bahn expressed its intention to sell Schenker, and DSV was considered a potential buyer. Ubisoft (video games) was the main detractor, impacted by the Chinese crackdown on online gaming and disappointing critic scores of their new Avatar game, despite good user reviews.

The Fund has remained market neutral throughout the month and had a net beta-adjusted exposure of 0% at the end of the month. The Fund has sought both to maintain a strict market neutrality and achieve a broadly macro-economically neutral portfolio. There were 18 positions in the long book at the end of the month. The top 5 long positions comprised 38% of the Fund's NAV at the end of the month as the Fund remained very concentrated. The Fund is highly liquid, as 100% of the portfolio could be liquidated within 1 week, using conservative liquidity assumptions.
