The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

INRIS PARUS

Share Class: C USD (ISIN: IE00BCBHSD17), (Currency: USD)

a sub-fund of InRIS UCITS PLC. The Fund is managed by Alma Capital Investment Management.

OBJECTIVES & INVESTMENT POLICY

The objective of the Fund is to generate absolute returns by using a long / short equity strategy.

This strategy is mostly long growth stocks and short companies with a structurally declining business.

In order to achieve its investment objective, the Fund will use a bottom-up approach, emphasizing stock picking, based on in-house fundamental analysis together with portfolio monitoring and risk control.

The Fund will primarily invest directly or indirectly in equities but will also use Financial Derivatives Instruments ("FDIs"). The Fund will primarily invest in North America or Europe but may also invest from time to time in other markets (including up to 20% of its NAV in emerging markets).

The Fund may utilise financial instruments such as forward contracts both for investment purposes and to seek to hedge against fluctuations in the relative values of its portfolio positions as a result of changes in currency exchange rates and market interest rates. The Fund may invest in FDIs for investment and/or hedging purposes. It is anticipated that the Fund will be able to have short exposure to equities or similar instruments through the use of FDIs. The FDIs used by the Fund will consist of swaps on single listed stocks or swaps on single OTC stocks, as well as contracts for differences.

The Fund may take synthetic long and short positions through investments in derivatives. The derivative's return is linked to movement in the underlying asset. A short sale involves the sale of a security that the seller does not own in the hope of buying the same security (or a security exchangeable for the same) at a later date at a lower price. A long sale does the opposite.

The Trading Advisor is free to choose how the assets of the Fund are invested within the limits of its investment policy.

The Fund does not currently pay a dividend. Any income arising is retained in the Fund and reflected in the value of the Share Class. Your Shares will be denominated in US Dollar, the Fund's Base Currency.

You may redeem your investment on every Wednesday and if such a Wednesday is not a Business Day, the preceding Business Day and/or such other day or days as the Directors may determine.

Recommendation: this Fund may be appropriate for investors who have an investment horizon of three years or more.

The Fund is actively managed with an absolute return approach. Solely by virtue of the fact that it uses the MSCI World 100% Hedged to EUR Net Total Return Index (the "Benchmark") for performance comparison purposes only, the Fund is considered to be actively managed in reference to the Benchmark. However, the Trading Advisor has full discretion over the composition of the Fund's portfolio, which is not constructed with any reference to the Benchmark. The performance fee is not calculated with reference to the Benchmark.

For further information, please see the "Investment Objective" and "Investment Policy" sections of Supplement 1 to the Prospectus. Unless otherwise defined in this document, all words and expressions defined in InRIS UCITS PLC's current Prospectus shall have the same meaning herein.

RISK AND REWARD PROFILE

The risk indicator is calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

The Fund is classified as category 4, as this represents the level of volatility the Fund is exposed to which is reflective of the objectives and investment policy which are detailed above.

The Fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Equity Risk: Equity risk and/or changes to the equity risk premium will have a significant impact on the performance of the equities held in the Fund. Potential or actual change in any company's financials held by the Fund could increase the level of perceived or actual risk.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the assets they are based on. The impact on the Fund is greater as derivatives are used in an extensive way. The use of derivatives may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its NAV and may result in gains or losses that are greater than the original amount invested.

Counterparty Risk: The insolvency of any institutions providing services, such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Liquidity Risk: Some of the underlying investments of the Fund may be more difficult to buy and sell which may affect the Fund's value.

Please see the section entitled "Risk Factors" in the Prospectus and in Supplement 1 to the Prospectus for a full list of risks related to the Fund.
