Fund Information

The objective of InRIS Parus Fund (the "Fund") is to generate absolute returns by using a long / short equity strategy. This strategy is mostly long growth stocks and shorts companies with a structurally declining business. In order to achieve its investment objective, the Fund will use a bottom-up approach, emphasizing stock picking, based on in-house fundamental analysis together with portfolio monitoring and risk control. The Fund will primarily invest directly or indirectly in equities but will also use Financial Derivatives Instruments (FDIs). The Fund will primarily invest in North America or Europe but may also invest from time to time in other markets (including up to 20% of its Net Asset Value in emerging markets). The Fund may take synthetic long and short positions through investments in derivatives. The derivative's return is linked to movement in the underlying asset. A short sale involves the sale of a security that the seller does not own in the hope of buying the same security (or a security exchangeable for the same) at a later date at a lower price. A long position does the opposite. The Trading Advisor is free to choose how the assets of the Fund are invested within the limits of its investment policy. Investors in the Fund must recognize that, due to the inherent characteristics of the markets in which the Fund invests, directly or indirectly, the value of their investment can go down as well as up, and that they may not receive back the monies originally invested. The liquidity in markets can vary and it may not always be possible for the Fund to disinvest or invest in any particular market. For further information, please see the "Investment Objective", "Investment Policy" and "Risk factors" sections of Supplement 1 to the Prospectus.

Portfolio Comments

The performance of the InRIS Parus Class I CHF hedged was -0.92% in September, where the long book detracted and the short book contributed positively. The Fund is at 7.56% YTD and at -16.80% since inception.

The MSCI World corrected -3.4% in September after a sustained rally lasting since April.

The balanced portfolio construction of the Parus Fund between growth and value explains the outperformance despite the high net exposure. Negative contribution from the long book came from Media and Software names as growth experienced a month of underperformance, and was offset partially by positive performance of William Hill, US consumer financials and Alibaba. The short book contributed positively mostly thanks to Credit Acceptance and Fortescue.

At the end of September, the net exposure of the Fund was +75.0% of the NAV, with a long exposure of +85.0% and a short exposure of -10.0%. The gross exposure was 95.0% of the NAV.

In the long book, Internet (+23.2%) was the largest sector, followed by Software (+10.9) and Pharmaceuticals (+10.2%). The long portfolio held 34 positions. In the short book, Finance (-3.6%) was the largest sector, followed by Basic Materials (-2.7%) and Retail (-1.3%). The short portfolio held 17 positions.

This document does not purport to describe all the risks associated with financial transactions. Before entering into an investment, it is recommended to carefully examine all conditions, assess the risks and determine whether it is appropriate for your financial needs and objectives in all respects. It is also recommended you consult your financial, legal and/or tax advisors before entering into an investment. Past performance may not be a reliable guide to future performance. The value of investments and any income from them can fall as well as rise. You may not get back the amount you invested. Fund performance is calculated by the administrator by using the daily net asset value ("NAV") of Funds of InRIS UCITS PLC. The NAV per share is calculated by subtracting the liabilities from the assets of the relevant Fund and then dividing the difference by the number of shares issued. These net of fees returns are calculated net of all fees including management fees, transaction costs and performance fees. Returns are calculated net of all withholding taxes on foreign dividends, legal fees, custody fees, administrative fees and operating expenses. Results reflect the reinvestment of dividends, capital gain, and other earnings when appropriate. Accruals for fixed income and equity securities are included in calculations. The benchmarks presented herein have not been selected to represent appropriate benchmarks for the purpose of comparison to the Fund's performance, but rather are disclosed to allow the comparison of the Fund's performance to that of certain well-known and widely recognized benchmarks. The benchmarks' volatility and risk profile may be materially different from the Fund's volatility and risk profile. In addition, the Fund's components differ significantly from the benchmarks' components. The indices' values are obtained from Bloomberg. Prospective investors should carefully consider these limitations when evaluating the performance in comparison to benchmark data provided herein. Annualized figures are calculated by geometrically linking the respective monthly return/value.
