### 2. Basis of Preparation

#### a) Statement of Compliance

The unaudited condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and interpretations issued by the International Accounting Standards Board ("IASB").

### b) Basis of Measurement

The unaudited condensed interim financial statements have been prepared in accordance with Irish Statute comprising the Companies Act 2014 under the historical cost convention as modified by the revaluation of financial assets and liabilities at fair value through profit or loss. Other financial assets and liabilities and non-financial assets and liabilities are stated at amortised cost or redemption amount (participating shares). The financial statements have been prepared on a going concern basis.

#### c) Functional and Presentation Currency

#### The Funds

Items included in the financial statements of the Funds are measured and presented using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency of InRIS Parus is USD while the functional currency of InRIS CFM Diversified and InRIS Perdurance Market Neutral are EUR.

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the reporting currency at the foreign exchange rate ruling at that date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised as a component of net gain from financial instruments at fair value through profit or loss and is not part of the net asset value ("NAV") of any sub-fund.

Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to the reporting currency at the foreign exchange rates ruling at the dates that the fair value was determined.

### 2. Basis of Preparation (continued)

### c) Functional and Presentation Currency (continued)

#### The Company

The functional currencies of the Funds of the Company are EUR or USD, reflecting the primary economic environment in which each Fund operates. Both currencies are reflective of the economic environment in which the Company operates and as such judgement is required in determining the appropriate presentation currency. The Company has adopted USD as its presentation currency.

Where Funds have a functional currency other than USD, those Fund's financial position and performance is translated from their functional currency to the Company's presentation currency, as follows:

- assets and liabilities, including net assets attributable to participating shareholders, are translated at the closing rate at each reporting date; and
- income and expenses for each Statement of Comprehensive Income and capital transactions are translated at average exchange rates (unless the average rate is not a reasonable approximation of the cumulative effect of rates prevailing on the transaction dates, in which case income and expenses and capital transactions are translated at the rates prevailing on the dates of each transaction).

Included in the Statement of Changes in Net Assets of the Company is an exchange difference due to the presentation of the financial statements in USD. This arises as a result of the conversion of the EUR Funds from their functional currency to the presentation currency of the Company as described above and has no impact on the NAV of each Fund.

Comparative balances have been reclassified where necessary to conform to the current period presentation.

#### 3. Significant Accounting Policies

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgement, and considers factors specific to the investment.

There were no transfers between levels during the financial period 30 June 2023 and financial year ended 31 December 2022.

The Manager or each of the Trading Advisors may, on behalf of a Fund, engage in transactions in financial derivative instruments ("FDIs") for the purposes of efficient portfolio management and/or to protect against exchange risks within the conditions and limits laid down by the Central Bank from time to time. Efficient portfolio management transactions relating to the assets of the Fund may be entered into by the Manager or each of the Trading Advisors aiming to hedge or reduce the overall risk of its investments, enhance performance and/or to manage interest rate and currency exchange rate risk. Such transactions may include foreign exchange transactions which alter the currency characteristics of transferable securities held by a Fund. Such techniques and instruments may include futures, options, forward foreign exchange contracts and swaps and stock lending and repurchase and reverse repurchase agreements and when issued and/or delayed delivery securities.

At 30 June 2023 and 31 December 2022, the Funds did not have any open efficient portfolio management instruments other than FDIs, details of which are included in the portfolio statements.

## NOTES TO THE FINANCIAL STATEMENTS For the financial period ended 30 June 2023 (continued)

#### 15. Efficient Portfolio Management and Transactions in Financial Derivative Instruments (continued)

#### Risk Factors of FDIs

Substantial risks are involved in trading FDIs. The value of positions is influenced by amongst other things, changing supply and demand for the underlying assets or by trade, fiscal and monetary policies of governments, foreign exchange controls as well as national and international political and economic events. In addition, government from time to time may intervene, directly or by regulation, in certain markets.

Certain of the derivatives in which the Funds may invest are interest and foreign exchange rate sensitive, which means that their value will fluctuate as interest and/or foreign exchange rates fluctuate. The Funds' performance, therefore, will depend in part on their ability to anticipate and respond to such fluctuations in market interest rates and to utilise appropriate strategies to maximise returns, while attempting to minimise the associated risks to its investment capital. Variance in the degree of volatility of the market from the Funds' expectations may produce significant losses to the Funds.

The Funds may enter into listed or OTC derivative transactions which are subject to the risk that the financial institution used as an intermediary or counterparty might default.

The Funds may also be subject to liquidity risk with respect to the FDIs whereby an illiquid market may make it difficult for the Funds to execute trades at a desired price.
